

G MURALI KRISHNAN

ASPIRING WEB PENETRATION TESTER · CYBER SECURITY ENGINEER · RED TEAMER

+91 72599 16747 • muralikrishnancy2021@gmail.com • Bengaluru, India
Linkedin: [linkedin.com/in/g-murali-krishnan-74b0a0366](https://www.linkedin.com/in/g-murali-krishnan-74b0a0366) GitHub: github.com/Krish-Legend13 TryHackMe: tryhackme.com/p/HunterHacker05

TECHNICAL SKILLS

SECURITY TOOLS

Kali Linux Nmap Wireshark Burp Suite
Splunk OSINT

SECURITY DOMAINS

VAPT Web Exploitation SQLi XSS CSRF
Red Teaming SOC Basics API Testing

PROGRAMMING

Python Java C C++ HTML

OTHER SKILLS

Full Stack (Basic) Git/GitHub Bash Scripting

CERTIFICATIONS

OSINT Investigation Techniques — Cyber Secured India (2025)

Full Stack Development — Self-paced

TryHackMe — **Top 1%** — Multiple pentesting rooms

ACHIEVEMENTS & CTFs

- CTF Winner — Ghostwire CTF, Tech Habba, Atria Institute of Technology (Apr 2026)
- CTF Winner — Level 4 SDP, Supraja Technologies (Mar 2026)
- CTF Winner — Level 3 SDP, Supraja Technologies (Nov 2025)
- CTF Winner — Acharya Institute of Technology (Oct 2025)
- CTF Winner — Level 2 SDP, Supraja Technologies (May 2025)
- CTF Runner-Up — Level 1 SDP, Supraja Technologies (Dec 2024)

PROFESSIONAL SKILLS

Problem Solving Communication

Teamwork Adaptability

PROFESSIONAL SUMMARY

Aspiring Web Penetration Tester and Red Teamer with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT), OWASP Top 10 web exploitation (SQL Injection, XSS, CSRF), and SOC/SIEM-based security monitoring. Proven track record of multiple CTF wins, with practical skills in reconnaissance, exploitation, and security tool development using Python.

EDUCATION

B.E. in Computer Science & Engineering (Cyber Security) 2023 – 2027 (Expected)
Sambhram Institute of Technology, Bengaluru · CGPA: 8.7/10

Pre-University Course (PCMC — Computer Science) 2021 – 2023
Indian Academy Pre-University College · 88.8%

10th Grade (CBSE) 2018 – 2021
Young Scholars Academy · 80.8%

PROFESSIONAL EXPERIENCE

Advanced VAPT & SOC Intern Jul 2026 – Present

Supraja Technologies

- Performing hands-on VAPT and API penetration testing to identify and assess web application vulnerabilities.
- Using Splunk and SIEM tools to support SOC operations, security monitoring, and log analysis.
- Developing a **secure messaging application** with a focus on network and application security.

Ethical Hacking & VAPT Intern Sep 2025 – Oct 2025

Supraja Technologies

- Conducted structured penetration testing following industry standards; performed OWASP Top 10 testing on web applications.
- Developed an Advanced SQL Injection Scanner tool for automated vulnerability detection.
- Performed reconnaissance and exploitation techniques; documented findings in professional penetration testing reports.

Cybersecurity Intern (Project-Based) Sep 2025 – Oct 2025

Skillcraft Technologies

- Applied authentication bypass and privilege escalation testing techniques to strengthen security-focused project development.

Cybersecurity Intern (Project-Based) Oct 2025 – Dec 2025

Elevate Labs

- Executed simulated red-team scenarios, performing web vulnerability discovery and exploitation.

PROJECTS

Nyx Nexus

HTML/CSS/JS Ollama

- Built a gamified cybersecurity platform with an integrated AI assistant (Ollama)
- Hack Nocturne 2.0, MVIT Bangalore.

CRON-X

Python Anomaly Detection

- Developed an AI-based intrusion and anomaly detection system simulating SOC monitoring workflows — Nexathon, Dr. TTIT KGF.

Sportshield

AI Media Authentication

- Built an AI-powered platform for continuous verification of sports media authenticity
- AIT Cepheus Hackathon.

AURA

CIS/NIST Security Auditing

- Developed a cross-platform compliance auditing tool automating CIS/NIST security checks with risk reporting.

PhishEye

Python Phishing

- Built a Python tool that analyzes emails and websites to score phishing risk level.

KRISHI

Blockchain AI Voice IVR

- Built a blockchain platform for farmers and consumers featuring an AI voice IVR assistant
- BGSCTET Advaya 2.0.

Cipher & Password Tools

Python Cryptography

- Built Python cryptography tools — Caesar Cipher, image encryption & password analyzer
- encryption, decryption, and strength checks.

SQL Injection Scanner

Python SQLi

- Developed a Python-based automated tool for detecting error-based and blind SQL injection vulnerabilities.

SKILL DEVELOPMENT PROGRAMS — SUPRAJA TECHNOLOGIES

- Level 1: Cybersecurity Foundations — Networking, Protocols, Security Basics
- Level 2: VAPT — Web application testing and exploitation techniques
- Level 3: SOC & Web Pentesting — Log analysis, incident detection
- Level 4: Industrial Cyber Security (ICS)
- OSINT by CTRL.ALT.ACT, Cyber Secured India (Sep 2025) — Practical OSINT investigation techniques

VOLUNTEERING

- Volunteer** — **GenXHack-26**: Assisted participants with technical setup and ensured smooth execution.
