PROFESSIONAL SUMMARY

Aspiring Red Teamer and Web Penetration Tester with hands-on experience in VAPT, web exploitation, and security tool development. Proven track record in CTF competitions with multiple wins. Passionate about identifying web application vulnerabilities, conducting reconnaissance, and simulating real-world attack scenarios. Seeking to leverage offensive security skills in a Red Team role focused on web application penetration testing.

EDUCATION

B.E. in Computer Science and Engineering – Cyber Security | Sambhram Institute of Technology, Bengaluru

2023 – 2027 (Expected) | CGPA: 8.81/10

Pre-University Course (PCMC – Computer Science) | Indian Academy Pre-University College

2021 – 2023 | 88.8%

10th Grade (CBSE) | Young Scholars Academy

2018 – 2021 | 80.8%

TECHNICAL SKILLS

Security & Offensive Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, OSINT Techniques, Web Application Pentesting, Basic Forensics

Security Domains: VAPT, Web Exploitation, SQL Injection, XSS, CSRF, Reconnaissance, Red Teaming, SOC Basics

Programming Languages: Python, Java, C, C++, HTML

Other Skills: Full Stack Development (Basic), GitHub Version Control, Bash Scripting

INTERNSHIP EXPERIENCE

Ethical Hacking and VAPT Intern | Supraja Technologies

July 2025 – October 2025

- Learned structured penetration testing methodology following industry standards
- Conducted vulnerability assessment of web applications including OWASP Top 10 testing
- Developed Advanced SQL Injection Scanner tool for automated vulnerability detection
- Gained practical exposure to reconnaissance, exploitation, and professional report writing

Cybersecurity Intern (Project-Based) | Skillcraft Technologies

September 2025 – October 2025

- Contributed to security-focused project development in controlled lab environments
- Applied vulnerability testing techniques including authentication bypass and privilege escalation

Cybersecurity Intern (Project-Based) | Elevate Labs

October 2025 – December 2025

- Worked on real-world simulated attack scenarios mimicking red team operations
- Practiced web vulnerability discovery, exploitation, and documentation

SKILL DEVELOPMENT PROGRAMS

Supraja Technologies

- **Level 1:** Cybersecurity Foundations – Networking, Protocols, and Security Basics
- **Level 2:** VAPT – Web application testing, exploitation techniques, and manual testing
- **Level 3:** SOC and Web Pentesting – Log analysis, incident detection, and advanced exploitation
- **Level 4:** Industrial Cyber Security – ICS

Cyber Secured India | OSINT by CTRL.ALT.ACT (September 2025)

- Practical OSINT investigation techniques for reconnaissance and information gathering

PROJECTS

- **Nyx Nexus** — Gamified cybersecurity platform with AI assistant (Ollama) for real-time guidance; full-stack HTML/CSS/JS build — Hack Nocturne 2.0 hackathon, MVIT Bangalore
- **CRON-X** — AI-based intrusion and anomaly detection system with behavioral detection logic simulating SOC monitoring — 24-Hour Nexathon Hackathon, Dr. TTIT KGF
- **KRISHI** — Blockchain-based platform for farmers & consumers with AI voice IVR assistant — BGSCET Advaya 2.0 24-Hour Hackathon
- **Sportshield** - an AI-powered Digital Asset Protection Platform that continuously verifies sports media authenticity - AIT Cepheus 24 Hour hackathon
- **AURA** — Cross-platform compliance audit tool automating configuration checks against CIS/NIST benchmarks with risk reporting
- **Advanced SQL Injection Scanner** — Automated tool for error-based and blind SQL injection detection
- **PhishEye** — Phishing detection system scoring suspicious emails and websites for risk level
- **KeySpy** — Educational keylogger built to understand keystroke monitoring in a controlled environment
- **Caesar Cipher / Image Encryption / Password Analyzer** — Python-based tools for encryption, decryption, and password strength assessment

CERTIFICATIONS & TRAININGS

- Web Application Penetration Testing – Supraja Technologies (2025)
- OSINT Investigation Techniques – Cyber Secured India (2025)
- React Bootcamp
- Java Bootcamp
- Full Stack Development
- TryHackMe – Top 2% on the platform, completed multiple web pentesting rooms

ACHIEVEMENTS

- **CTF Winner** – Ghostwire CTF (Tech Habba), Atria Institute of Technology (April 2026)
- **CTF Winner** – Level 4 SDP, Supraja Technologies (March 2026)
- **CTF Winner** – Level 3 SDP, Supraja Technologies (November 2025)
- **CTF Winner** – Level 2 SDP, Supraja Technologies (May 2025)
- **CTF Winner** – Acharya Institute of Technology, Bangalore (October 2025)
- **CTF Runner-Up** – Level 1 SDP, Supraja Technologies (December 2024)
- Participated in IIT Madras CTF – Shastra
- **Hackathon Volunteer** – GenXHack-26 (8-hour college hackathon)
- Successfully identified and exploited multiple web vulnerabilities in competitive CTF environments
